Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

With regards to the Appeal Brief filed on 03/31/05, the final rejection is thereby withdrawn. The application is opened for prosecution.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 21 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Lupo et al. (English version of EP0676461A2). Lupo disclose a laser comprising a substrate (p.38, 1.8-27), an organic layer structure comprising an organic solid laser dye comprising a spiro compound of formula II (p.4-5) where the benzo groups can be substituted and/or fused independently of one another.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 25-26 and 31-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lupo et al. (English version of EP0676461A2) in view of Suzuki et al. (US3523045). Lupo disclose all limitations of the claim except for the light source being a laser. Suzuki teach the light source being a laser (col.1, 1.72). For the motivation of pumping the gain medium to excite, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Lupo what is taught by Suzuki.

Allowable Subject Matter

Claims 29 and 33-35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
